

EMPLOYEE SAFETY PERCEPTION SURVEY

Safety Culture Assessment

A DATA DRIVEN TOOL

A powerful, data-driven tool for understanding, bench-marking and catalyzing your organization's journey toward world-class safety performance.

Use of internationally validated statistical software adds value to the analytics.

RECEPIENTS' VIEW

Consultivo 'Employee Safety Perception Survey' (ESPS) helps an organisation to understand the effectiveness of the safety management system from the other end of activities - the recipients. This is an output driven measurement of the safety initiatives.

SCOPE OF THE SURVEY

The survey covers evaluation of the safety culture of the employees with reference to occupational health and safety issues, assess employee involvement level in the existing safety program and measures the employee perception regarding the existing safety management.

Globally, **Employee Safety Perception Survey (ESPS)** is being considered as a measure of the “organizational health and **Safety Culture**”.

HOW DO WE CONDUCT THE SURVEY?

Consultivo uses veteran safety professionals as well as behavioural scientists; who have vast survey experiences. The team generally comprises of different layers of professionals who has specialised skills to interview top management as well as people with low literacy level.

THINK WE CAN DO THIS TOGETHER?
