

FIRE & ELECTRICAL SAFETY TRAINING

PROGRAMME OVERVIEW

Today electricity has become the backbone of development and most important element required to sustain modern society life. Besides, accident statistics show that nearly 40% of electrical accidents have resulted in fatality indicating its potential of severity. With an increase in reported injuries and deaths associated with the use of electricity, electrical safety has become an area of concern.

LEARNING FROM THE LEADERS...

The trainers have more than 30 years of industrial experience in the field of Electrical Safety including interpretation, application and consultation on the legal requirements in various types of industries across different states in India. They share practical approach in compliance through structured case studies, blended with theoretical inputs.
